

Connexion Team Productivity Suite

Connexion Team Productivity Suite is a Suite of Web-based Enterprise Applications that enable sharing, reuse of enterprise information and data as well as help track and manage business related issues/calls and leave and attendance information. It can be used with any leading web browser. This Suite provides an Enterprise Web Portal, a Document Management System, a Call Tracker and Leave and Attendance System. The Suite can be integrated to all leading ERPs (Oracle EBS, SAP etc) and can be used independently also.

The Suite has been built using Best of the Breed Technologies and works with all major hardware platforms and servers.

Enterprise Web Portal (with Document Management)

Enterprise Web Portal is targeted at revamping the working experience of the internal users (employees) through an **Enterprise Collaboration platform**. The platform will enable the users with **Collaboration features, Document management** and many other related functionalities thereby reducing time to access information and dependency on departments. The platform will provide an **integrated view** of the entire business eco system containing following major features

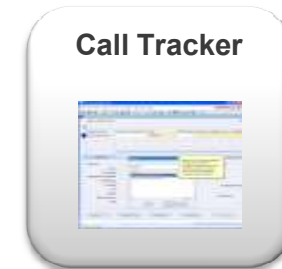

- **Collaboration**
 - Forums & Discussion Board
 - Task List
- **Content Management**
 - Document Management (to store, view and search documents like CAD designs etc)
 - Versioning, Document Access, Author, Owner, creation, update data
 - **Document Management can be integrated with any leading ERP**
 - Employee Directory
 - Quick Links / Shortcuts
 - Alerts
 - Announcements / eNewsletters
 - List of holidays
 - Survey
- **Search**
 - Content Search
- **Accessibility**
 - Microsoft IE Compatible, Document-format independent
 - Custom Look & Feel / Branding
- **Monitoring and Administration**
 - Website Statistics / Metrics

Call Tracker

Call Tracker empowers your Support Teams (IT, HR etc) to quickly and effectively handle support issues and provide best level of service to employees of the organization as well as external parties. Call Tracker provides following main features

- Options, either for AD Authentication or Database authentication
- Provision for Call Logging and tracking
- Email Notifications
- IT Assets Management
- Server Management/ Notification
- Call Assignment to Engineers based on Call Category and Location
- Configurable Escalation mechanism based on Call Categories and location
- Attachment of multiple files (doc, xl, bmp, jpg etc) to Call Records
- Admin functionalities including Creation of Categories, Creation of Users etc...
- Standard reports like Ageing Reports

Leave and Attendance

Leave and Attendance Module facilitates you to manage, track, regularise employee attendance and feed this data to Standard ERPs if required. This module provides following main features

- Online Leave Application
- Online Recommendation, Approval of Leave
- Email notifications to HR and concerned Authority
- Online view of Leave Plans and Attendance of subordinates
- Online view of Leave Balances and leaves for individuals
- Integration with Bio-metric attendance Systems, where ever required
- Attendance Sheet Report and other reports for HR are available
- All kinds of Leaves (SL, CL, PL etc) can be configured
